Osbee Recruiting Department

99 Calvert St Suite 100, Harrison, NY 10528

Dear Recruiting Representative,

While working at Boeing for the past five years as a structure analyst, I have had the chance to work on different groups and various programs. This experience has further my knowledge in engineering.

I believe that my background will enable me to contribute significantly to your team as I have extensive knowledge on Computer Aided Design and Finite Element Analysis. I am also experienced with manufacturing and costumer support. As a Mechanical/Aerospace Engineer, I have worked on the development phase of the 777x. I have also led a team of 18 engineers while working on the 787 program.

I look forward to the prospect of working in your company and help you design creative solutions to your home automation systems. I hope to have the opportunity to discuss my qualifications with you further.

Sincerely,

Marcio Villanueva
